

TEST STRAATEGIES

PREPARATION BEFORE THE TEST

- ✎ Be prepared. Start studying well before the night before the test.
- ✎ Memorizing can only take you so far. Persevere to learn the “why” behind what you are doing.
- ✎ Be responsible! If you are away, get notes from a desk partner so that you can get caught up.
- ✎ Come ready with pencils, eraser, ruler, calculator.

TAKING THE TEST

- ✎ Read through the test first; do all the questions that you feel most comfortable with first/the ones you know how to do.
- ✎ Show all your work! Judge the size of your answer. The amount of space given is usually how much space the response should take.
- ✎ Don't get stuck on a question (especially those worth 1 mark); move on and come back later.
- ✎ Check through the test once completed.
